

TEXAS EXES ALUMNI CENTER

Location: Austin, TX
Size: 10,390 sq ft

The Texas Exes Alumni Center addition and renovation expands the 1980s alumni center designed by Charles Moore and Richard Dodge. The project complements the architectural sensibilities of the existing building with an updated material sensibility on the interior while taking advantage of the unique siting of the alumni center in relation to both the Darrell K. Royal Texas Memorial Stadium and Waller Creek.

Visitors enter through a light-filled, double-height entry vestibule clad with cedar and mahogany siding and featuring an open stair with Texas native limestone treads. The interior unfolds from the entry to reveal a new Legends Room, kitchen and bathrooms on the first level, and a maple-paneled lobby and board room on the second level. The progression ends at an outdoor deck that provides a place of prospect for alumni to survey the UT tower, creek and stadium.
